-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Ex Parte Quayle

Response to Amendment

1. This Office Action is responsive to preliminary Amendment received 4/14/2005. Amendment to Specification and Claims is made of record as requested.

Abstract

2. The abstract of the disclosure is objected to because the abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

Art Unit: 2616

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

See MPEP § 608.01(b).

Allowable Subject Matter

3. Claims 1-5 are allowed over prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art of record, Yamashita (US 6,467,083) and "Standard for a Global Embedded Processor Debug Interface" THE NEXUS 5001 FORUM, IEEE-ISTO, XP002247195, although in the same field of endeavor, fails to disclose, alone or in combination, a method for transmitting digital messages through output terminals, the inventive method steps include "providing a first bit group corresponding to message identifier and a fixed number of bits identical whatever the supervision circuit type; second bit groups, at least one comprising fixed number of bits depending on the identifier and on the type of supervision circuit, the other bit groups depending on the identifier but independent from the supervision circuit type; third group depending on the message to be transmitted and comprising number of bits greater than one; and fourth bit groups each having number of bits >1 , the number of the fourth groups depending on the identifier and on the determined supervision circuit type", as in claim 1 and 5 herein.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to AFSAR M. QURESHI whose telephone number is (571)272-3178.
